- MAGNOLIA Training Resources
WELCOME to MAGNOLIA, the Mississippi Alliance for Gaining New Opportunities Through Library Information Access.

MAGNOLIA is a statewide consortium funded by the Mississippi Legislature which provides online research databases for publicly funded K-12 schools, public libraries, community college libraries, and university libraries in Mississippi.

MAGNOLIA began in 1997 when Mississippi legislators appropriated $568,000 to purchase online databases for publicly funded libraries in Mississippi. Senator Grey Ferris of Vicksburg was instrumental in bringing this project to the legislature. The legislature continues to fund MAGNOLIA even after 10 years. With funding now exceeding $1.2 million, MAGNOLIA databases are being used by libraries and the citizens of Mississippi.

The MAGNOLIA databases have been of great benefit to Mississippi residents since August 1997. In addition to searching the databases in libraries across the state, individuals can also access the electronic resources available through MAGNOLIA from their home or office computers. Interested individuals should contact their local library for the necessary location ID and/or password.

MAGNOLIA News

07/6/2010: MAGNOLIA Update --

Previously the MAGNOLIA Steering Committee reported that MAGNOLIA had suffered a decrease in its budget from the Mississippi Legislature. Since that time, the Committee has been working with several libraries and entities around the state to identify funding to maintain some of the MAGNOLIA resources.

OCLC WorldCat: We are very fortunate that Shanman Smith, Executive Director, Mississippi Library Commission, proposed to the MLC Board (and they accepted the proposal) that LSTA funding be used to pay the subscription to OCLC WorldCat. Therefore, all libraries will continue to have access to the OCLC WorldCat resources through MAGNOLIA.

CREDO Reference: Likewise, several libraries and entities provided the necessary funding to keep the CREDO Reference database.

Contributors include:

• MELO (the Community College Virtual Library),
• Mississippi Library Commission,
• Mississippi State University,
• University of Southern Mississippi,
MAGNOLIA Training Resources  Tags: magnolia information literacy library science curriculum and instruction education

This guide provides training resources for use with MAGNOLIA databases. Also included are handouts and PowerPoint slides from prior MAGNOLIA presentations.

Last update: Sep 23rd, 2010  URL: http://guides.library.msstate.edu/magnolia

The Library Instructional Services Department of the MSU Libraries actively works to promote and support the MAGNOLIA (Mississippi Alliance for Gaining New Opportunities Through Library Information Access) project through workshops, online training sessions, and training materials. Please feel free to use any of the materials or tutorials provided in this guide when working with MAGNOLIA databases or training!

If you have questions about any of the resources provided in this guide, please feel free to contact the Library Instructional Services Department at (662) 325-0910.

Database Highlight

Credo Reference continues to update its content. When new materials are added, we will highlight some of the new reference titles you have available to your library.

CredoReference provides an online ready reference collection that includes hundreds of encyclopedias, dictionaries, handbooks, directories, and other reference resources. Here are some of the latest titles added to the CredoReference collection:
MS Association of Career and Technical Education Presentations

The following presentations were made at the 2009 Mississippi Association of Career and Technical Education. All files are in pdf format.

- Incorporating Information Literacy into the Workforce
  PowerPoint slides. Presented by Elizabeth Downey

- Health Information Resources for Educators
  PowerPoint slides. Presented by Brad Brazzeal.

- Copyright: What Every Educator Should Know
  PowerPoint slides. Presented by Brad Brazzeal.

- MAGNOLIA and Business Resources
  PowerPoint slides. Presented by Deborah Lee.

- Internet Safety and Acceptable Use Policies
  PowerPoint slides. Presented by Deborah Lee.

January 11, 1944 Address of President Franklin D. Roosevelt

January 11, 1944 Address of President Franklin D. Roosevelt

Ladies and gentlemen:

Today I sent my Annual Message to the Congress, as required by the Constitution. It has been my custom to deliver these Annual Messages in person, and they have been broadcast to the Nation. I intended to follow this same custom this year. But, like a great many other people (of my fellow countrymen), I have had the "flu" and, although I am practically recovered, my Doctor simply would not permit me to leave the White House to go up to the Capitol.

Only a few of the newspapers of the United States can print the Message in full, and I am anxious that the American people be given an opportunity to hear what I have recommended to the Congress for this very fateful year in our history -- and the reasons for those recommendations. Here is what I said: This Nation in the past two years has become an active partner in the world's greatest war against human slavery.

We have joined with like-minded people in order to defend ourselves in a world that has been gravely threatened with gangster rule.

But I do not think that any of us Americans can be content with mere survival. Sacrifices that we and our Allies are making impose upon us all a sacred obligation to see to it that out of this war we and our children will gain something better than mere survival.

We are united in determination that this war shall not be followed by another interim which leads to new disaster -- that we shall not repeat the tragic errors of ostrich isolationism.

Agriculture and Pollution

1.1 SETTING THE SCENE

During the latter half of the twentieth century, the global human population doubled from less than 3000 million to 6000 million. As the global population increases, demand for food continues to rise. This leads to the intensification of agriculture which in turn places increasing demands on the natural environment (Brown et al., 2000).

Agriculture is of fundamental importance to any national economy and the lifeblood of rural communities throughout the world. It occupies 35% of the world’s land surface with 11% under direct cultivation and 24% managed as permanent pasture (UNEP, 1992). In the United Kingdom more than 76% of land is under agricultural production (MAFF, 2000a). The first evidence of agricultural activity in the UK can be traced back to 5000 BC (Reed, 1990), although our book is concerned with changes occurring only in the last 70 years or so. The UK agricultural industry has undergone a major revolution since the 1930s; progress in animal and crop breeding, the availability of pesticides and fertilisers, and ever-advancing technology has resulted in a substantial increase in productivity and levels of national self-sufficiency.

Successive government policies, notably the farm support measures of the Agriculture Act 1947...

Global Warming

Increase in average global temperature, amounting to approximately 0.74°C/1.3°F from 1906 to 2005. Much of this is thought to be related to human activity. Global temperature has been highly variable in Earth history and many fluctuations in global temperature have occurred in historical times, but this most recent episode of warming coincides with the spread of industrialization, prompting the suggestion that it is the result of an accelerated greenhouse effect caused by atmospheric pollutants, especially carbon dioxide gas. The melting and collapse of parts of the Larsen Ice Shelf, Antarctica, in two distinct events in January 1995 and February 2000, have been attributed to global warming, as has the reduction in the Arctic polar ice cap. Melting of land-based ice is expected to raise the sea level in the coming decades (melting of floating ice does not alter sea level).
