Today’s Session!

1. What is MAGNOLIA?
2. Using EbscoHost
3. Specialized MAGNOLIA Resources
4. Promoting MAGNOLIA
Established in 1997 by the Mississippi Legislature.

Covers all publicly funded K-12 schools, public libraries, community colleges and the IHL universities.

Core information databases from EBSCO, OCLC, and Credo.
Who Pays?

- Continued support through the Mississippi Legislature.
- Additional support provided by MELO (MS Community Colleges), participating libraries, and the Mississippi Library Commission (through a LSTA grant).
- Your support is vital!

WELCOME to MAGNOLIA, the Mississippi Alliance for Gaining New Opportunities Through Library Information Access.

MAGNOLIA is a statewide consortium funded by the Mississippi Legislature which provides online research databases for publicly funded K-12 schools, public libraries, community college libraries, and university libraries in Mississippi.

MAGNOLIA began in 1997 when Mississippi legislators appropriated $568,000 to purchase online databases for publicly funded libraries in Mississippi. Senator Grey Ferris of Vicksburg was instrumental in bringing this project to the legislature. The legislature continues to fund MAGNOLIA even after 10 years. With funding now exceeding $1.2 million, MAGNOLIA databases are being used by libraries and the citizens of Mississippi.

The MAGNOLIA databases have been of great benefit to Mississippi residents since August 1997. In addition to searching the databases in libraries across the state, individuals can also access the electronic resources available through MAGNOLIA from their home or office computers. Interested individuals should contact their local library for the necessary location ID and/or password.

MAGNOLIA News

07/6/2010: MAGNOLIA Update --

Previously the MAGNOLIA Steering Committee reported that MAGNOLIA had suffered a decrease in its budget from the Mississippi Legislature. Since that time, the Committee has been working with several libraries and entities around the state to identify funding to maintain some of the MAGNOLIA resources.

OCLC WorldCat: We are very fortunate that Sherman Smith, Executive Director, Mississippi Library Commission, proposed to the MLC Board (and they accepted the proposal) that LSTA funding be used to pay the subscription to OCLC WorldCat. Therefore, all libraries will continue to have access to the OCLC WorldCat resources through MAGNOLIA.

CREDO REFERENCE: Like many, several libraries and entities provided the necessary funding to keep the CREDO Reference database.

Contributors include:

- MELO (the Community College Virtual Library),
- Mississippi Library Commission,
- Mississippi State University,
- University of Southern Mississippi,
The Library Instructional Services Department of the MSU Libraries actively works to promote and support the MAGNOLIA (Mississippi Alliance for Gaining New Opportunities Through Library Information Access) project through workshops, online training sessions, and training materials. Please feel free to use any of the materials or tutorials provided in this guide when working with MAGNOLIA databases or training.

If you have questions about any of the resources provided in this guide, please feel free to contact the Library Instructional Services Department at (662) 325-0810.

The Chiasmic Embrace of the Natural World in Eudora Welty’s *Delta Wedding*

*by Kelly Sultzbach*

In southern literature, interactions with the land have often defined the people themselves. Although Eudora Welty’s *Delta Wedding* has been labeled as a southern pastoral, the natural world in the novel doesn’t necessarily need to be depicted as static and idyllic. Welty's description of the land is dynamic, ever-changing, and integral to the development of the plot and characters.

From the Seed Savers Exchange

Celebrating its 50th anniversary in 2010, the Seed Savers Exchange is a nonprofit network of gardeners dedicated to preserving and sharing heirloom seeds. Since 1973, Exchange members have passed on approximately 1 million samples of rare seeds to other gardeners.

The organization, permanently maintains several thousand endangered vegetable varieties on its 890-acre Heritage Farm in Decorah, Iowa, and the bounty of the Exchange's seed preservation efforts lives in countless gardens, kitchens and markets across the country.

You can support the Seed Savers Exchange by becoming a member, or by purchasing one of its splendid 2010 calendars, which feature elegant photos of heirloom fruits, vegetables and flowers, as well as mouthwatering, garden-fresh recipes. This celebration of garden diversity makes a perfect holiday gift. 2010 calendars are $13.95 each and are available at www.seed savers.org, or by calling 563-382-5990. (The heirloom varieties featured here are also available from the Seed Savers Exchange.)

Here is an exclusive sampling of pages from previous Seed Savers Exchange calendars, featuring photos from edible- landscaping expert Rosalind Creasy. (To find recipes that use the heirloom varieties shown on these pages, look up this article at www.MotherEarthNews.com.)

A Bountiful Harvest
This vibrant spread includes tomatoes, peppers, cranberry beans, ‘Triamble’ squash, and ‘Rouge Vif d’Etampes,’ also known as the Cinderella pumpkin. Tailing down from the basket of peppers are Brussels sprouts, which originated in Belgium more than 400 years ago and were introduced to the United States by Thomas Jefferson.

Apples Aplenty
At the beginning of the 20th century, North America was home to 7,000 named apple varieties. Less than a quarter of that number exist today. The

Since Sam Merlotte is now known to be two-natured, suspicion falls immediately on the anti-shifters in the area. Sookie suspects otherwise, but her attention is divided when she realizes that her lover, Eric Northman, and his "child" Pam are plotting to kill the vampire who is now their master. Gradually, Sookie is drawn into the plot which is much more complicated than she knows. Caught up once again in the politics of the vampire world, Sookie will learn that she is as much of a pawn as any ordinary human—and that there is a new queen on the board..."—

With the fourth season of True Blood about to debut on HBO, the pump should be well primed for another print installment of Sookie Stackhouse's supernatural southern adventures. The excitement kicks off when someone firebombs Merlotte's Bar and Grill while Sookie is working, but that plotting isn't the focus of the story; instead, vampire politics rear their ugly head once again as the regent of Louisiana does his best to provoke Eric and Pam. With a vampire-on-vampire showdown looming, Sookie tries to deal with her increased concerns over her blood bond with Eric, to understand the real reason her fee cousins, Claude and Dermot, are living with her, and to plan a baby shower for best friend, Tara. While the series has become much more about fantasy than mystery, it still has always drawn fans across genres, and this fast-paced and fun entry will be no exception. HIGH DEMAND BACKSTORY. Sookie mania shows no sign of abating anytime soon, and with nicely timed release dates for the latest book and the new season of the TV series, the feeding frenzy is sure to continue. --Moyer.

**Series Title:** Sookie Stackhouse novels

**Also Known as:** Southern vampire series

**Series Author:** Harris, Charlaine

**Description:** (First book in series) Sookie Stackhouse is a cocktail waitress in small-town Louisiana, but she keeps to herself and doesn’t date much because of her “disability” to read minds. When she meets Bill, Sookie can’t hear a word he’s thinking. He’s the type of guy she’s waited for all of her life, but he has a disability, too—he’s a vampire with a bad reputation. When one of Sookie’s coworkers is killed, she fears she’s next.

The periodic table arranges the chemical elements in two ways. The first is by atomic number, starting with hydrogen (atomic number = 1), in the upper left-hand corner and continuing in ascending order from left to right. The second is by the number of electrons in the outermost shell. Elements having the same number of electrons in the outermost shell are placed in the same group. Since the number of electrons in the outermost shell is large, only elements in the same column have similar chemical properties.

The arrangement of the elements was devised by Dmitri Mendeleev in 1869, before many of the elements now known were discovered. To maintain the overall logic of the table, Mendeleev allowed space for undiscovered elements whose existence he predicted. This space has since been partly filled in, most notably by the addition of elements 104–112, elements 110–112 have been isolated experimentally, but not yet synthetically.

The lanthanide series (elements 57–71) and the actinide series (elements 89–103) are composed of elements with Group 3b chemical properties. They are placed below the main body of the table to make it easier to read.
