Copyright vs. License
OA publishing benefits
Author rights & publisher agreements
Identifying reputable journals
Some Publishing Terms

- A “preprint” is the author’s original version of a manuscript that has been submitted to a journal for review and possible publication.

- A “postprint” is the peer-reviewed version of a manuscript that has been accepted for publication.

- The “version of record” is the accepted journal article that has further undergone copyediting, proof correction, typesetting, and layout.
TYPICAL OA PUBLISHING MODELS
Green Model

Article is published in a subscription journal, but author may deposit a version of the article in a repository or personal website after publication.

This model is supported by Mississippi State’s Institutional Repository; http://ir.library.msstate.edu
Gold Model

Article is published in a freely available open access journal, but may be supported by the author paying an article processing charge.
Hybrid Model

Article is published in a subscription journal, with an author option to pay for open access of that individual article.

LICENSING VS. COPYRIGHT

Mutually exclusive & mutually supportive
All Rights Reserved

Some Rights Reserved

No Rights Reserved
**OA PUBLISHING**

**benefits**
- Free to access & redistribute
- Increased discoverability
- Article level metrics
- Copyright retention
- Potential for increased citations
- Reuse, with any modifications, in your dissertation

**concerns**
- Article processing charge
- Acceptance by peers
- In academia, promotion & tenure requirements
- Peer-review rigor
Think About Author Rights Ahead Of Time

What rights are important to you and your co-authors to retain?

Research journal author-publisher agreement(s).
Negotiate. Use addenda.
Publisher restrictions can prohibit reuse of an article you wrote in your thesis or dissertation.
“When the work has been accepted for publication, the author may post it, in its final accepted form, on their personal server, on their institution’s server, or on an organized preprint server, with a notice “Accepted for publication in In Vitro Cellular and Developmental Biology – Plant as of <Date>.” After publication, authors may update this notice to read, “This material has been published in In Vitro Cellular and Developmental Biology – Plant, <issue number and date, page numbers>, the only accredited archive of the content that has been certified and accepted after peer review. Copyright and all rights therein are retained by Society for In Vitro Biology.” A link to the Society’s website should also be included. If you receive a PDF off-print of your article post-publication, you may only use it for the purpose of dissemination to individual colleagues and for your own personal use, and you may not post it on a web server in place of the preprint version.”
SpringerOpen cost to make your article open access—

$3000

“The open access publication fee does not replace any other existing journal publication costs, which are billed separately (e.g. surcharges for color figures in print, oversized articles, etc.).”

FRONTIERS Open Access & Copyright Statements

“Frontiers is fully compliant with open access mandates, by publishing its articles under the Creative Commons Attribution licence [sic] (CC-BY).”

“...authors of articles published in Frontiers journals retain copyright on their articles, except for any third-party images and other materials added by Frontiers, which are subject to copyright of their respective owners.”
Article processing charge to publish in Frontiers in Bioengineering and Biotechnology

From FREE to $1,900

Depending on type of article.
IDENTIFYING PREDATORY OR ILLEGITIMATE JOURNALS
SOME CLUES

- Publication ownership & management not revealed
- Article processing charges or other fees not transparent
- Unclear, minimal or no peer review process description
- Poor grammar, illogical sentence structure (whatever the language used)
- Lack of information on editorial or other governing board
- Email addresses not affiliated with institutions
- Copyright/licensing information lacking
MORE CLUES

- Unrealistic turnaround for publication, or fee-based offer for quicker turnaround
- False impact factor claims (or use of index copernicus value (icv), a false metric)
- Publishing schedule & journal archiving information missing
- No conflict of interest/retraction policy
- No statement of adherence to/membership in COPE or OASPA
- Research misconduct reported
THINK.CHECK.SUBMIT.

A source with a checklist.
IOSR Journal of Engineering (International Organization of Scientific Research)

Dear Researcher,

IOSR Journal of Engineering (IOSR-JEN) is ISO 32977:2017 certified open access and peer reviewed reputed International Journals. IOSR Journals invites articles that illustrate research results, projects, surveying works and industrial experiences that describe significant advances in the areas of Computer Science, Engineering, Mechanical Engineering, Electrical and Electronics Engineering, Information Technology, VLSI Design and Technology, Electronics and Communication Engineering, Automobile and Robotics Engineering.

ISCR Journals keep continuous monitoring of various renowned databases such as DOAJ, EBSCO Host, Cabell's Directory, CORE, SCOPUS, Google Scholar (USA), CABS Database.

IOSR Journal of Engineering provide DOI (Digital Object Identifier) to each published article.

IOSR Journal of Engineering 2015 published article's Annual Citation Percentage is 8.14%.

DOI Prefix allotted for IOSR Journal of Engineering is 10.9790.

IOSR-JEN has released 7 Volumes and 01 Issues.

IOSR-JEN published papers in last issue from more than 13 Countries including Nigeria, Malaysia, Iran, Iraq, China, New Zealand, India, Bangladesh.

Submission Deadline: 20th January 2017
Acceptance notification: After One week of Paper Submission
Paper Publication: 30th January 2017

You can submit your manuscripts by following link Submit Your Article
